

FOR IMMEDIATE RELEASE

WORLD TRAVEL, INC. PARTNERS WITH JUNO TO REDEFINE GUEST TRAVEL

Philadelphia, Pa, July 21, 2025 — World Travel, Inc. is excited to announce a strategic partnership with Juno, the all-in-one platform built specifically for guest travel and expense management.

Guest travel was recently reported the #1 pain point for travel managers in the GBTA's 2025 Perfect Business Trip Report, ranking higher than travel disruptions and expense reports. 57% of travel programs report difficulty booking and coordinating guest trips. These travelers don't have corporate cards, don't use internal tools, and don't know the policy—resulting in time-consuming and manual coordination.

This collaboration brings a smarter, faster, and more human approach to how our customers move their most important guests—candidates, clients, contractors, partners, and VIPs.

What This Means for Our Customers:

- **Effortless Booking:** Guests can book flights and hotels in under two minutes—no logins, no confusion, just a guided, intuitive experience.
- **Lightning-Fast Reimbursements:** Out-of-pocket expenses are verified and reimbursed in under 48 hours, with support for 40+ currencies.
- **24/7 Human Support:** Juno blends automation with real people to provide proactive, around-the-clock assistance.
- **One Seamless Journey:** From booking to reimbursement, everything happens in one place—no juggling tools or chasing receipts.
- **Tailored for Guest Travel:** Juno is purpose-built for non-employee travelers, offering concierge-level care and clear, guided itineraries.

"Our customers are often managing travel for people outside their organization—candidates, clients, and partners who deserve a smooth, professional experience," said Ivan Imana, Chief

Information Officer at World Travel, Inc. “Partnering with Juno allows us to deliver that experience at scale, with speed, clarity, and care.”

Further, the new partnership advances World Travel, Inc.’s capabilities to add even more value to key industries, including:

- **Life sciences**, where travel for guest healthcare providers is essential to care delivery, product development, and product distribution.
- **Higher education**, where guest faculty, speakers, and visiting researchers travel frequently.
- **Media, sports, and entertainment**, where production travel involves hundreds to thousands of guests, each with unique needs, preferences, and timelines.

The partnership is now live and available to all World Travel, Inc. customers. For more information, visit www.worldtravelinc.com or contact Barb Barnard, Executive Vice President Sales & Marketing, World Travel, Inc. at bbarnard@worldtravelinc.com.
